Simulation Healthcare Education

History

Describe the history you just obtained from the patient. Include only information (pertinent positives and negatives) relevant to this patient's problem(s).

Physical Examination

Describe any positive and negative findings relevant to this patient's problem(s). Be careful to include only those parts of examination you performed in this encounter.

Diagnostic Reasoning

Based on what you have learned from the history and the physical examination, list up to 3 diagnoses that might explain this patient's complaint(s). List your diagnoses from the most to least likely. For some cases, fewer than 3 diagnoses will be appropriate. Then, enter the positive or negative findings from the history and the physical examination (if present) that supports each diagnosis. Lastly, list initial diagnostic studies (if any) you would order for each listed diagnosis (e.g. restricted physical exam maneuvers, laboratory tests, imaging, ECG, etc.)

Diagnosis #1

History
Finding(s) #1

Diagnosis #2

History
Finding(s) #2

Diagnosis #3

History
Finding(s) #3
